## AngelEye Health Announces New Clinical Advisor

(NASHVILLE, TN) – (July 11, 2019) – AngelEye Health, a leading provider of patient engagement solutions, announced the addition of Jaylee Hilliard, MSN, RN, NEA-BC, as a clinical advisor. Jaylee will be focused on supporting hospital and health system partnerships with AngelEye Health. She joins the AngelEye Health team with more than a decade of progressive clinical experience, most recently serving as director of neonatal services and the pediatric extracorporeal membrane oxygenation (ECMO) program at McLane Children’s Baylor Scott & White Hospital.

“We recognize that the pediatric and neonatal environment requires specialized patient and family support and we are taking a strategic step forward by adding Jaylee and her clinical experience to our team,” says Christopher Rand, chief executive officer of AngelEye Health. “Her expertise and passion for family-integrated care empowers our focus on creating solutions that connect, communicate, and educate.”

Recently, the Company expanded beyond its AngelEye Camera System to a comprehensive software platform that supports clinical communication, patient and family education, and family engagement. The AngelEye Virtual Care Platform allows parents of children in the Neonatal and Pediatric Intensive Care Units the ability to be an active participant in their child’s care. Jaylee states, “As a former director of clinical departments, a bedside nurse, and a family caregiver, I look forward to serving as a liaison between AngelEye Health and its partners. I am excited that AngelEye Health is well positioned to further enhance ways to support family-integrated care and improve patient outcomes.”

### About AngelEye Health

AngelEye Health is a leader in the delivery of virtual engagement solutions that remove the physical barriers that separate patients and families from their care teams and loved ones. Patients and families gain peace of mind through visual access, while hospitals enhance communication across the care continuum, increasing patient satisfaction, improving outcomes, and reducing readmissions. In addition to Family Engagement, today, the company’s comprehensive platform includes tools for Clinical Communication and Patient and Family Education.

Founded in 2013 by clinicians at the University of Arkansas, AngelEye Health has partnered with over 62 hospitals, with more than 11,000 parent users and 25,000 family users annually. For more information, visit [angeleye.health](http://angeleye.health).
