

Meet IRIS

ANGELEYE'S
NEW CAMERA
INNOVATION

-  **5-inch LED Touch Screen** to assist with camera positioning and on/off capability
-  **Infrared Capabilities** for a clear visual of baby, even in the darkest environments
-  **Flexible mounting** options for any unit configuration
-  **USB Ports** for future functionality, such as one-way audio and extension cameras
-  **Antimicrobial** additive impregnated in the camera housing
-  **Upgrade-ready** for remote software updates

The new IRIS camera was built applying the valuable insights and experience shared by clinicians and parents. As we continue to innovate and add new capabilities, the IRIS camera can be automatically updated with additional functionality without having to replace the camera. That means you benefit from our commitment to listening and continually improving our technology without the hassle and expense of downtime associated with swapping hardware.

Innovation in hardware, software and service. Let us show you the difference.
